

Natural Health Products - Good Manufacturing Practice (GMP)

- Course Objective:** The program will consist of lectures, recent developments from Health Canada, step-by-step guidance on all aspects of GMP, and case studies.
- Course Description:** This course is designed to provide hands-on training on GMP requirements in the manufacture of Natural Health Products (NHPs). This one-day course will focus on the principles and application of the GMP part of the regulations as they apply to the operational and management of today's Natural Health Product industry. Emphasis will be placed on Quality Systems and the preparation of Standard Operation Procedures (SOPs)
- Course Outline:**
- Basic Concepts of GMP - What are they, why do we have them, and how do we deal with them?
 - The 4 Ps of GMP – Place, People, Processes and Products
 - Records and documentation - Simple and Very Effective Documentation Practices
- Practical advice on dealing with the difficult areas of GMP: change control, deviations, error correction.
- Risk Classification of GMP
 - Preparing for a GMP audit
 - Case Studies
